SOYBEAN INSPECTIONS DROP SHARPLY IN NOVEMBER

Inspected receipts of soybeans dropped sharply in November to a total of 16,700 cars compared with 32,278 cars in October, according to inspectors' reports to the Grain Branch of the Production and Marketing Administration. November inspections brought the total for the first two months of the season to 48,978 cars compared with 54,271 cars for the same months of 1945.

The quality of the soybeans inspected in November was lower than for the preceding month, only 63 percent grading No. 2 or better compared with 77 percent in October. October-November inspections show the quality of this season's crop considerably below the exceptionally good 1945 crop, with 73 percent grading No. 2 or better compared with 93 percent for the same period in 1945.

Inspections of soybeans in November included the equivalent of 493 cars inspected as cargo lots and truck receipts equivalent to about 300 cars.
